Resume - Arjun Mehta

Email: arjun.mehta@example.com

Mobile: +91-9458255877

Education

B.A. in Economics

Stanford University

2012 - 2016

B.Tech in Computer Science

Harvard University

2012 - 2016

M.Sc in Data Science

Delhi University

2012 - 2016

Work Experience

Google

Role: Software Engineer

Duration: 0.7 years

Responsibilities: Developed and optimized systems, collaborated with cross-functional teams.

Adobe

Role: Software Engineer

Duration: 2.6 years

Responsibilities: Developed and optimized systems, collaborated with cross-functional teams.

Accenture

Role: Software Engineer

Duration: 2.3 years

Responsibilities: Developed and optimized systems, collaborated with cross-functional teams.

Flipkart

Role: Software Engineer

Duration: 4.8 years

Responsibilities: Developed and optimized systems, collaborated with cross-functional teams.

Adobe

Role: Software Engineer

Duration: 2.5 years

Responsibilities: Developed and optimized systems, collaborated with cross-functional teams.

TCS

Role: Software Engineer

Duration: 2.4 years

Responsibilities: Developed and optimized systems, collaborated with cross-functional teams.

Meta

Role: Software Engineer

Duration: 4.8 years

Responsibilities: Developed and optimized systems, collaborated with cross-functional teams.

Meta

Role: Software Engineer

Duration: 1.9 years

Responsibilities: Developed and optimized systems, collaborated with cross-functional teams.

Amazon

Role: Software Engineer

Duration: 3.5 years

Responsibilities: Developed and optimized systems, collaborated with cross-functional teams.

Skills

Data Analysis, Machine Learning, TensorFlow, PyTorch

Projects

Project Name: Marketing Automation Tool

Role: Marketing Analyst

Responsibilities: Automated campaign performance analysis, increasing ROI by 25%.

Project Name: Resume Parser

Role: Data Scientist

Responsibilities: Built ML models to parse unstructured resumes into structured JSON format.

Project Name: AI Chatbot

Role: AI Developer

Responsibilities: Developed an AI-based conversational chatbot using NLP and deployed it on cloud.

Project Name: Resume Parser

Role: Data Scientist

Responsibilities: Built ML models to parse unstructured resumes into structured JSON format.

Project Name: Marketing Automation Tool

Role: Marketing Analyst

Responsibilities: Automated campaign performance analysis, increasing ROI by 25%.

Project Name: E-commerce Platform

Role: Backend Developer

Responsibilities: Designed and implemented REST APIs, improved response time by 30%.
